

BOTANICAL FORMULAS

Phra Vichien's approach to healing is based in detoxification, immune support, and total body health. For this reason there are a lot of multi-herb formulas used at the clinic. The clinic's formulas are often multifactorial, generally safe for non-compromised patients, and are used liberally to support other focused single botanical applications. While primary support is given to specific anatomical systems or disease processes, there is always a general need for cleansing the spirit, mind, and body, and supporting general health and fitness.

A number of these formulas are mass produced, with large quantities dispensed weekly, such as ***Pramman Formula***, ***Supparoak Formula*** and **Balm**. Others are made as needed for specific patients, such as the **Detoxification Tonic** and the **Skin Formula**. In addition, these formulas are basic blueprints that can be modified for individual patients, this is commonly done with the ***Bumloong Formula***.

Usually one to forty bottles of formulas and a hundred or so units of skin care dispensers are produced at a time. There is always work to be done in cleaning donated bottles, restocking the herbs, cleaning the equipment, packing and shipping formulas, dispensing to visiting patients, and delivering product as needed.
